Moving and positioning a dependent patient can be challenging. Performing these tasks on the average-size person can be difficult and unsafe for both patient and caregiver. With heavier patients, the task can be even a greater challenge.

That's why Global Medical Sales supplies the **Convertible™ I-Series**. Now patients can enjoy the freedom of mobility and comfort of easily-adjusted positioning, all under safer conditions. The **Convertible™ I-Series** chairs are available to accommodate up to 1000 pounds.
